

Album Viewer

The album viewer opens in a separate window. This is the interface that your visitors see when you share and publish your albums.

Toolbar

Button	Function	Description
	Back	Go back to previous album.
	Refresh	Refresh the content windows.
	Open	Open the selected item. For albums, this opens the album. For images, this opens the image in the image viewer . For other media files, this opens the file in the media player .
	Link	Display the URL or the HTML code for the selected file. Use this URL or HTML code if you would like to share a single file rather than the whole album.
	Download	Download the selected file(s) to your computer.

Language

Select your preferred language for the interface from the drop-down list of available languages.

- English
- German
- Dutch
- French
- Spanish
- Italian
- Simplified Chinese
- Traditional Chinese
- Japanese
- Russian
- Korean

This setting is only available for visitors. If you are currently logged in as a user of the network drive, please go to [Applications > System Appearance > Language](#) to change the language.

File View

Select how the files are displayed.

Button	Function	Description
	View as Thumbnail	Shows content as thumbnails.
	View as Details	Shows content as thumbnails with additional details.
	View as List	Shows content in list view without thumbnails.
	Slide Show	Shows content as slide show.
	Cover Flow	Shows content as cover flow.
	Cooliris 3D Wall	Shows content on a 3D wall with help of the Cooliris plugin.

To see all the available views (6), make sure to open an album first, otherwise, only the standard views (3) are available.

Album List

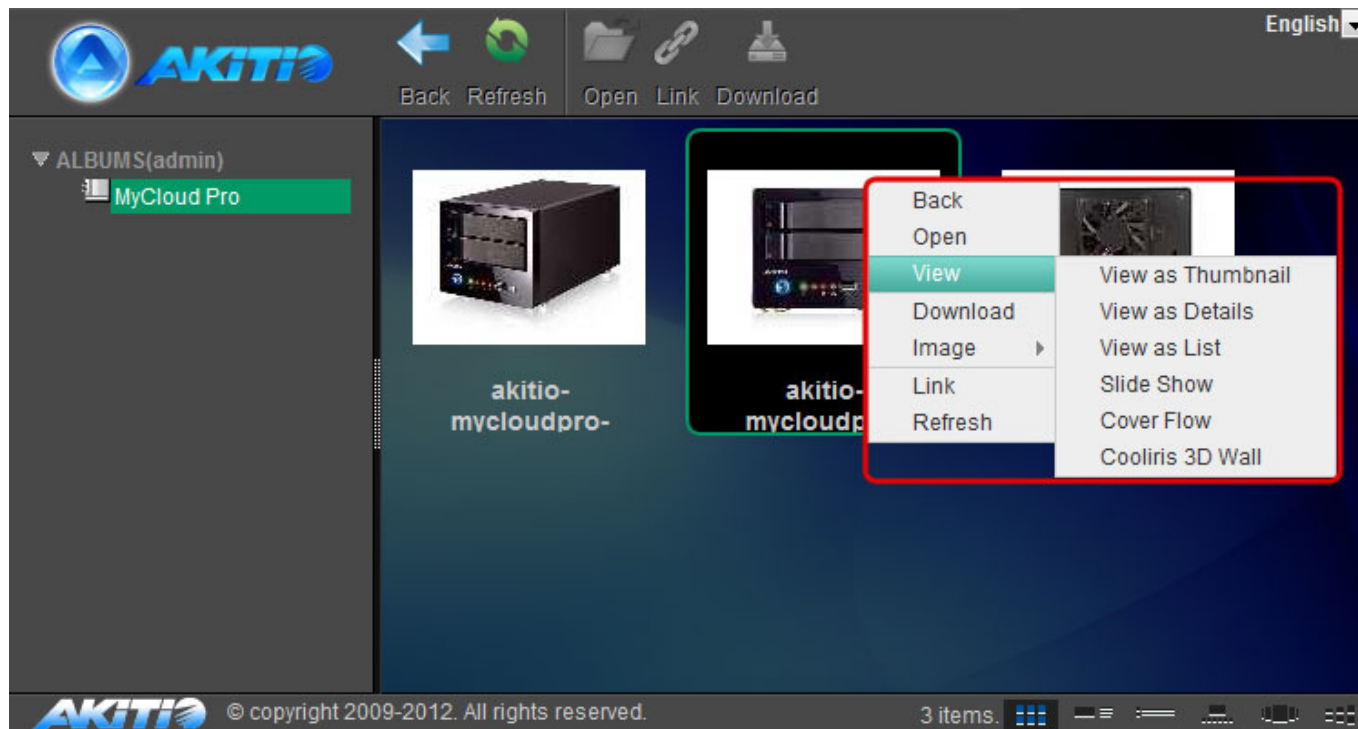

In the album list you can see:

- **Logged in users:** All your own albums as well as any albums that have been shared with you by other users.

- **Visitors:** The published album(s).

Context Menu

All the commands in the toolbar are also available in the context menu when you right-clicking on a file in the content window.

Managing Files

Selecting multiple files

To select multiple items in the content window, you can:

- **Control (Ctrl) click:** Press and hold the control key to select multiple files in random order.
- **Shift (Shift) click:** Select the first file in a sequence, press and hold the shift key and then click on then the last item to select a range of files in order.

Viewing media files

To view a a media file, you can:

- Select the file and click **Open**.
- Select the file, right-click on it and choose **Open** from the context menu.
- **Double-click** on the file.

For images, the files open in the [image viewer](#). For other media files, the files open in the [media player](#).

Sharing single files

If you would like to share a single file rather than the whole album, you can copy the hyperlink to the file and post or share the link to only the selected file.

1. Select the file that you would like to share in the content window.
2. Click **Link** in the toolbar or right-click on the item and select **Link** from the context menu.
3. Depending on how you would like to share this file, you can:
 - Copy the link and post it on Twitter, post it on Facebook or send it to your friends by e-mail.
 - Copy the code and post it on your blog article or webpage.
