

# Media Player

The media player application allows you to play digital audio and video files that are stored on the network drive directly in the web interface. Simply double-click the files in the file explorer and the media player opens automatically to start playback.

The media player (flash player) supports following file formats natively: **\*.mp3**, **\*.flv** and **\*.swf**. For other file formats, media playback is handled by the available plug-ins of the web browser (e.g. Quicktime for \*.mov videos).

## Toolbar

Button	Function	Description
	Refresh	Refresh the content window.
	Show Player	Show or hide the player screen. You can also double-click on a media file to open the player screen.
	Previous	Go to previous file in the list. This button is not available if you have only selected a single file for playback.
	Play	Play the selected file or if no files are selected in the track list, start playback at the beginning of the current playlist.
	Next	Go to the next file in the list. This button is not available if you have only selected a single file for playback.
	Add List	Add a new playlist.

Button	Function	Description
	<b>Rename List</b>	Rename the selected playlist.
	<b>Delete List</b>	Delete the selected playlist.
	<b>Add Items</b>	Add new items to selected playlist.
	<b>Copy</b>	Copy the selected file(s) to the clipboard.
	<b>Cut</b>	Move the selected files(s).
	<b>Paste</b>	Paste the file(s) from the clipboard or move the files to the selected playlist.
	<b>Delete</b>	Delete the selected files(s).

## Playlists

In the panel on the left side, you can access your custom playlists. The playlist **Recent** is created by default and shows all the files that were recently played in the media player.

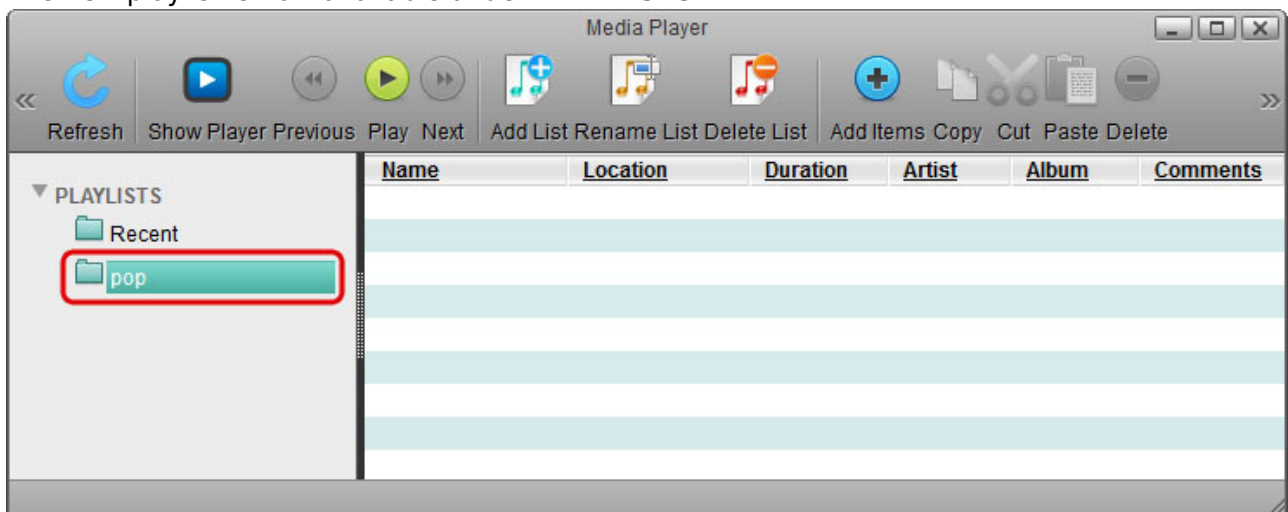

### Add Playlist

1. To create a new playlist, click **Add List** 
2. Enter a name for the new playlist and click **OK**.

The dialog box titled "Add List" contains a text input field with the word "pop" entered. Below the input field are two buttons: "OK" and "Cancel". The "OK" button is highlighted with a red rectangle.

3. The new playlist is now available under **PLAYLISTS**.

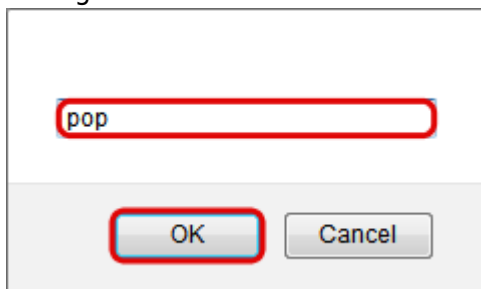

## Rename Playlist

1. To rename a playlist, select the list that you would like to rename and then click **Rename List**

2. Change the name and click **OK** to save it.

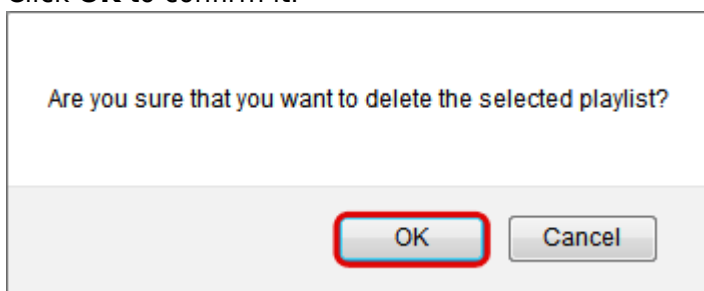

pop

OK Cancel

## Delete Playlist

1. To delete a playlist, select the list that you would like to delete and then click **Delete List**
2. Click **OK** to confirm it.

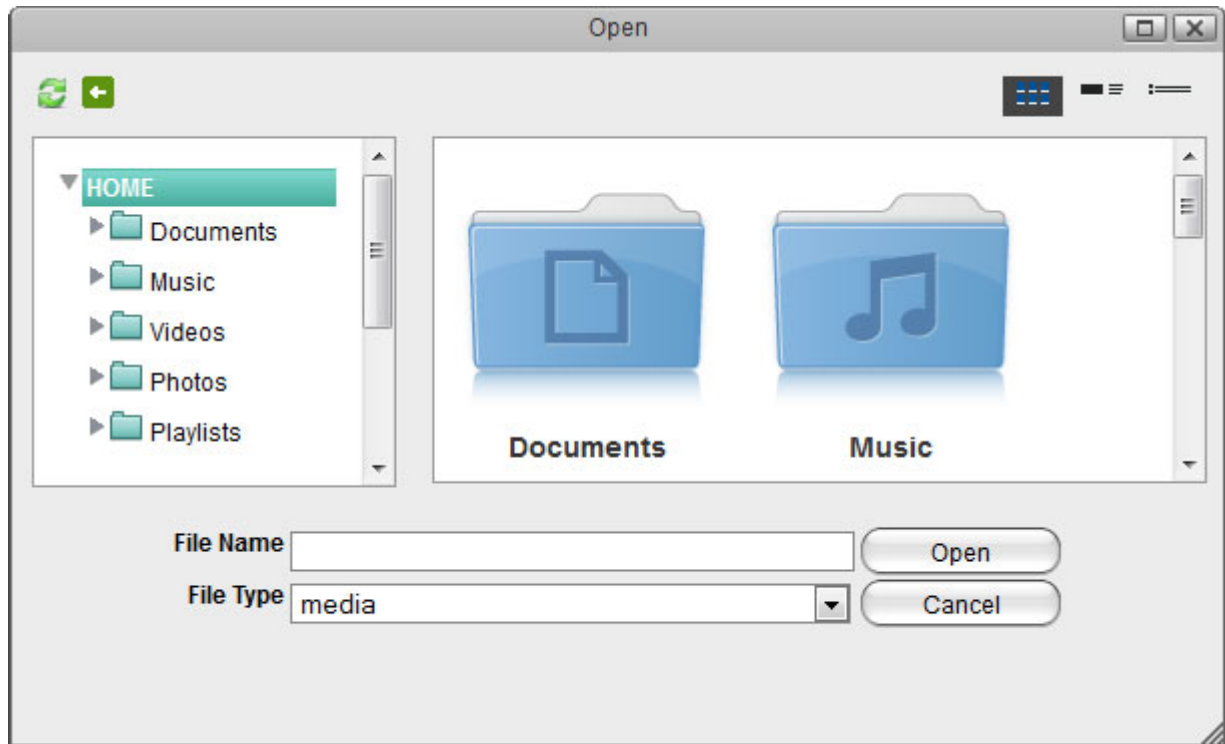

Are you sure that you want to delete the selected playlist?

OK Cancel

## Adding new files to a playlist

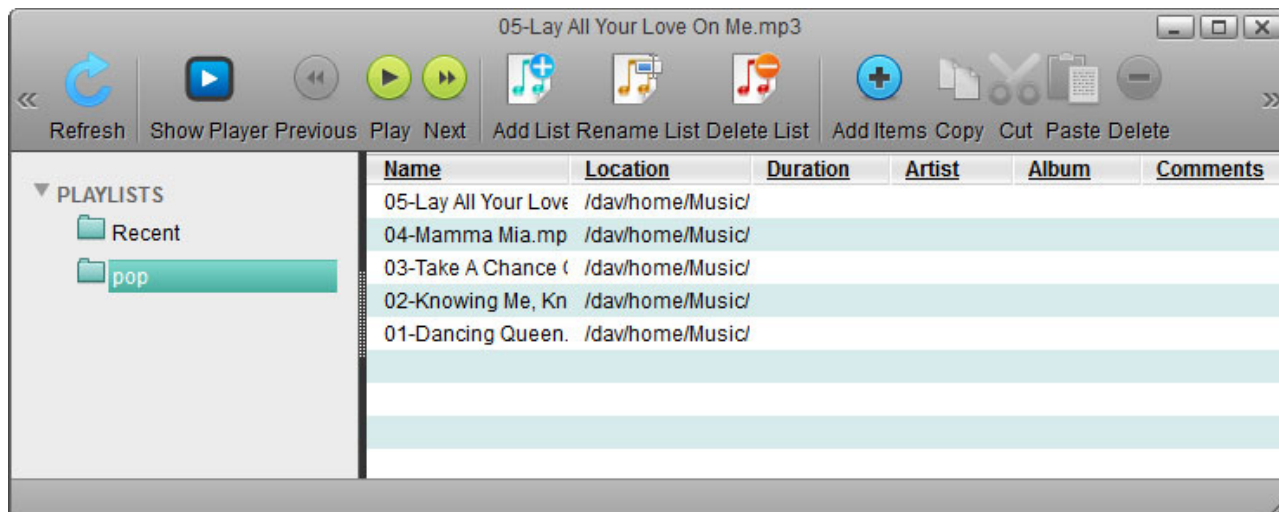

1. Select the playlist where you would like to add the new files.
2. Click **Add Items** 
3. Locate the folder where your media files are stored.

4. Control (Ctrl) or shift (Shift) click to select the files that you would like to add to the playlist and then click **Open**.

5. The files are now added to your custom playlist.

## Track List

In the main window you can view and manage the files in your playlists. Use the buttons in the toolbar or the context menu to edit the files. Double-click on any item to start playback or make sure no files are selected and then click **Play** to start playing the whole playlist.

Field	Description
<b>Name</b>	Shows the name of the file.
<b>Location</b>	Shows the path where the file is stored on the network drive.
<b>Duration</b>	Shows the playback time of the file.
<b>Artist</b>	Shows the name of the artist.
<b>Album</b>	Shows the name of the album which the file belongs to.
<b>Comments</b>	Shows additional comments about the files.

## Selecting items

To select multiple items, you can:

- **Control (Ctrl) click:** Press and hold the control key to select multiple files in random order.
- **Shift (Shift) click:** Select the first file in a sequence, press and hold the shift key and then click on then the last item to select a range of files in order.
- **Select All:** Right-click to open the context menu and use the select all command to select all files in the current playlist.

## Context menu

To edit the files in the playlist, you can also use the context menu by right-clicking on a file in the track list.

Command	Description
<b>Select All</b>	Select all files in the current playlist.
<b>Select None</b>	Deselect all files.
<b>Play</b>	Play the selected file.
<b>Add Items</b>	Add new items to selected playlist.
<b>Copy</b>	Copy the selected file(s) to the clipboard.
<b>Cut</b>	Move the selected files(s).
<b>Paste</b>	Paste the file(s) from the clipboard or move the files to the selected playlist.
<b>Delete</b>	Delete the selected files(s).
<b>Refresh</b>	Refresh the content window.
